

Whatever the camera, wherever the shoot, whatever the format – the Anton/Bauer standard for performance and reliability lead the way. From the innovative new **ElipZ**® system for handhelds to the field proven reliability of **InterActive**® **Gold Mount**® batteries and chargers cameramen around the world rely on Anton/Bauer to back their video operations.

From Mini...

Now Anton/Bauer goes back to its roots in the film industry with the introduction of a new power source for Digital Cinema and film cameras.

The **Cine-VCLX** 560 watt hour power house has 2 regulated 28v outputs (3-pin XLR) and a 14 volt output (4-pin XLR) which can be used simultaneously and without switches. High rate NiMH cells provide up to 10 amps from the 28 volt channel and 20 amps from the 14 volt channel. CINE-VCLX also features a RealTime™ display for accurate remaining runtime indication.

A specialized **CINE-VCLX-CA** version, specifically designed for use with the Sony F-23 Cine Alta camera, supplies both 28 and 14 volts on a single cable, via an 8-pin Lemo connector along with a single 28 volt 3-pin and a 14 volt 4-pin.

To CINE

antonbauer

*The power behind the best cameras
capturing the best images in the world.™*
